

BPS CONES

**SLACK STORAGE FOR FIBER TO
THE HOME PROJECTS IN PEDESTALS**

BPS182720-LP

BPS182720-SP

The BPS cone vault gives you slack fiber storage, while allowing you to maintain required bend diameters and without filling the pedestal with condensation and icing.

THE BPS182720

- ★ Stores 50' - 100' of slack (depending on cable size)
- ★ Inexpensive
- ★ Seals moisture between the pedestal and slack storage
- ★ Easy to install
- ★ Removable lid and slack for easier access while splicing

BPS182720-LP
6" opening for medium to large pedestals.

BPS182720-SP
4" opening for small pedestals.

Both 18" top diameter,
27" bottom diameter,
20" height.

Your pedestal is fastened to the removable lid with aluminum brackets and stainless steel fasteners. The removable lid is attached to the cone with fasteners, accessible from above.

Stored slack can be a lifesaver if the pedestal is damaged, needs to be relocated or if the line is cut. It can also let you get the splicing out of the inclement weather.
